

SECURITY ASSESSMENT QUESTIONNAIRE

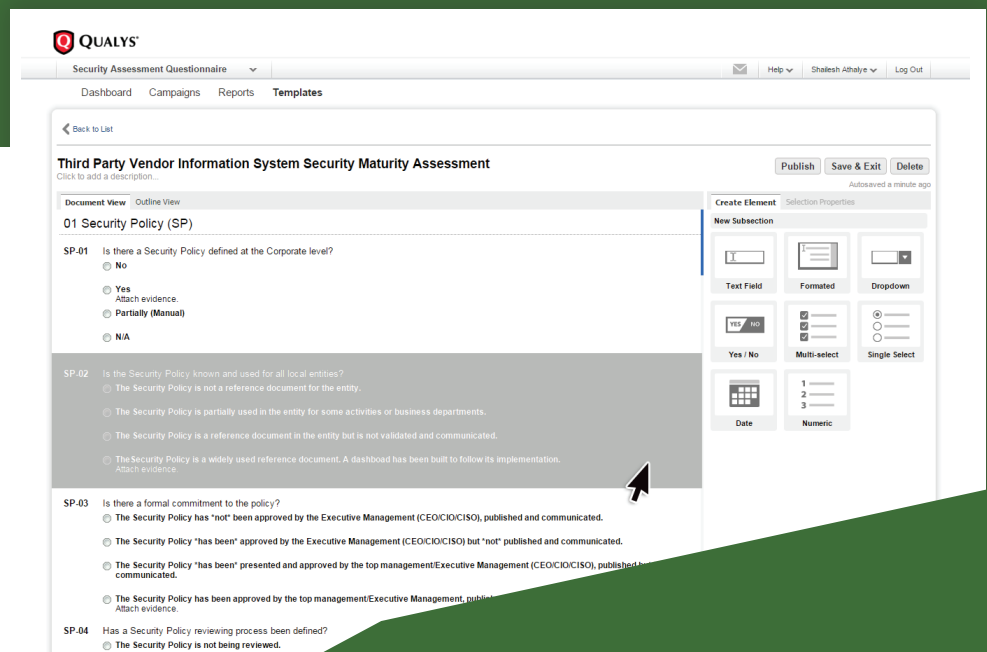

Assess Business Risk with Automated Campaigns

Everything you need for continuous security & compliance

Buy Qualys SAQ as a standalone application or as part of the Qualys Cloud Platform. It's a security and compliance hub where you can discover, secure and protect all of your global IT assets wherever they reside.

The Qualys Security and Compliance Suite includes these valuable tools:

- AV** – AssetView
- CM** – Continuous Monitoring
- VM** – Vulnerability Management
- PC** – Policy Compliance
- SAQ** – Security Assessment Questionnaire
- PCI** – PCI Compliance
- WAS** – Web App Scanning
- WAF** – Web App Firewall
- MD** – Malware Detection
- SEAL** – Qualys Secure Seal

Qualys Security Assessment Questionnaire (SAQ) is a cloud-based service that enables you to collect and analyze information about your business easily, quickly, and without reinventing the wheel. With this service, you can expand the scope of risk and compliance beyond technical vulnerabilities and controls to verify that internal departments and third-party vendors are audited for operational governance and process compliance.

Built on the world's leading cloud-based security and compliance platform, Qualys Security Assessment Questionnaire (SAQ) frees you from unreliable and resource-intensive approaches such as emails and spreadsheets by automating the process of collecting operational business process data to report on regulatory compliance and third-party risks.

Benefits:

Unify your technical and business process assessments onto a single platform, reducing complexity and accelerating audits.

Identify and assess the security and compliance of your vendors, partners, suppliers and other third-party relationships.

Ensure compliance with emerging and complex regulatory requirements with out-of-the-box templates.

Key Features:

Qualys Cloud Platform

Revolutionize both security and compliance with the industry's most integrated, scalable and extensible cloud platform.

- Deliver & manage multiple solutions from a single environment.
- Deploy immediately from a public or private cloud – fully managed by Qualys and always up-to-date.
- Scales up globally, on demand.
- Centralize discovery of host assets for multiple types of assessments.
- Organize host asset groups to match the structure of your business.

Define Templates

Quickly design and build your templates.

- Use intuitive, web-based, easy-to-use UI to create questionnaire templates or leverage our pre-built library of out-of-the-box templates covering common compliance standards such as ISO, PCI, HIPAA, HITrust, NIST and vendor risk guidelines.
- With interactive template designing, you can define the options, requirements for evidence, comments or asset-specific attachments for each of the questions needing assessment.
- Rapid template creation for forming questions simply by dragging and dropping input controls such as text boxes, check boxes, drop downs and date elements.

Launch & Track Campaigns

Send campaigns via the web console and assign subject matter experts to monitor response activity in real-time dashboards and reports.

- Automate the information gathering from internal departments or third-party vendors by launching the campaigns via web console with due date, assigning them to the responsible parties.
- Use a variety of workflow options such as simple information gathering and assign reviewer and/or approver as needed.
- Easily reassign and delegate questions based on business process adjustments and updates.
- Centrally manage and monitor the progress of all of your campaigns by their due dates.
- Automatically send assignments or reminder emails to respondents and track the status of the campaigns.

Key Features continued:

Intuitive Responding

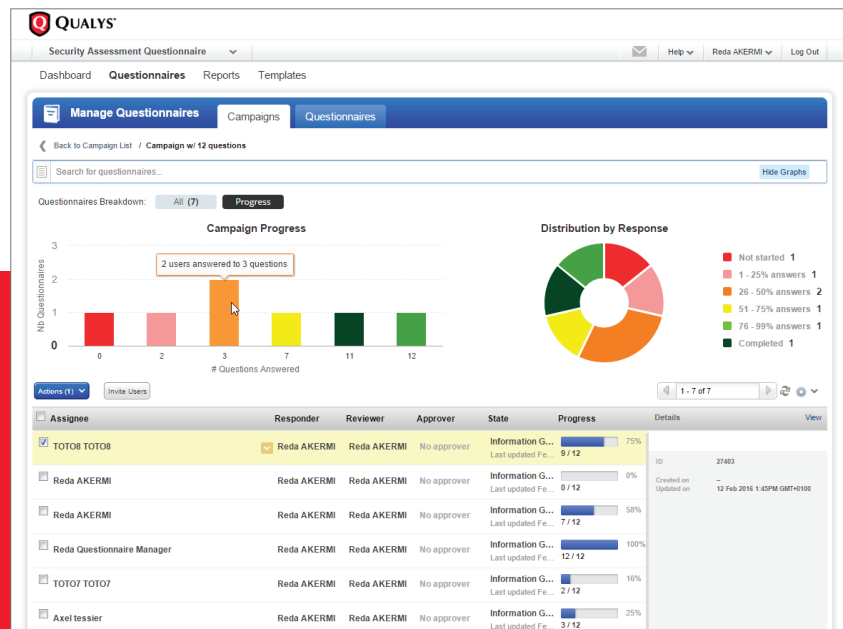

Instant access from any web browser with role-based capabilities

- Respondents, vendors, and subject matter experts can quickly and efficiently complete questionnaires from any browser at any time.
- Evidence files can be securely attached with drag-and-drop convenience.
- Questions within a specific campaign can be delegated to other users or user groups based on their role, and reviewers and approvers can also be assigned these tasks.
- Reminder emails help in knowing the due dates and status on completion.

Reports and Dashboards

Instantly monitor and report on campaign progress across audiences.

- Provide executive-level dashboards and detailed drill-down views for internal auditors and compliance officers.
- Real-time reports provide you immediate visibility into your assessment across audiences (third parties, internal audit, executives, and more).
- Analyze responses across multiple campaigns, track the progress of critical campaigns, track the progress of the responding parties, and dashboards with drill down options for quick reporting to different audiences.
- Ability to review the individual questionnaires submitted for all campaigns and overall performance.
